

We are looking for a locum coverage from February 2024 - January 2025.

Position includes coverage of 2 half-day out-patient clinics per week in Hypertension/General Nephrology at Women's College Hospital, and 8 weeks/year of in-patient coverage at Sunnybrook Health Sciences Centre. Both sites are fully affiliated with the University of Toronto and include clinical teaching with trainees.

Position will allow the successful candidate time for other locum coverage or academic endeavors if desired. The successful candidate must hold an MD degree and have certification by the Royal College of Physicians and Surgeons of Canada in nephrology and licensure in Ontario by start date.

Flexibility available with regard to components of coverage (e.g. out-patient only) and duration. Please do not hesitate to contact me for further information.
