Effective March 20, 2020 – BC Renal version

CHANGES to Your Hemodialysis Schedule

Dear hemodialysis patient,

Thank you for understanding that these are difficult times during COVID-19. We are trying to be sure that you receive the best and safest care possible, and that all patients in the unit receive the best and safest care possible.

Because the situation is changing, we may be making changes to your dialysis schedule.

We would make these changes based on knowing your medical condition and situation, and would believe them, at the time, to be safe for you. Also, we would re-assess the situation and the impact these changes have on your health.

Circled below is/are the option(s) that the health care team believes will keep you and the other patients safe at this time:

1. We will shorten your dialysis time.

2. We will have you come in less often than usual.

3. We will have you come in at a different time (to reduce the number of patients in the waiting room at any given time).

4. Your dialysis will be moved to another facility: _____

Thank you for understanding. We appreciate your co-operation.

Your Hemodialysis Team
