Triage System for loss of capacity for assisted PD

1) NIPD and good RRF (>3mL/min), should tolerate alternate day cycling for 2 weeks or more

2) NIPD and poor RRF (<3) or CCPD and good RRF (>3), should tolerate up to 2 weeks alternate day cycling

3) CCPD and poor RRF (<3), significant risk of complication with alternate day cycling

4) Category 1 got 16 hour cycling alternate days, cat 2 18 hours, cat 3 are last resort for alt day cycling and would do 18 hours alt days.
